This month's table has a positive total figure for the first time since May 2008. The freight tonnes INCREASED by 3.7% when compared to December 2008. However, the passenger figures show no improvement, with a year on year reduction of 12.9% which is worse than last month. The Moving Annual Total figure for passengers has, as expected, fallen below 19 million, which last occurred in 2002. How will the bad weather affect the January figures??
